

COMPANY PROFILE

About Us

Pro-Axpert Construction was founded to deliver quality civil construction and mining services. Pro-Axpert construction is a multidisciplinary engineering company offering road construction plus maintenance, rural development services, mining services and concrete works. Our target markets include the private as well as the public sector.

Pro-Axpert construction was started in March 2016 by Mr Matimbi Lutendo, a Civil Engineering Technician who holds National diploma in building sciences, Btech in building sciences and M tech in building sciences still in progress.

We appreciate you taking the time reviewing our profile and would be honoured to be allowed to jointly discuss fitting solutions for your projects.

Kind Regards,
Mr. Matimbi LD

- Founder and CFO of Pro-Axpert Construction

Our Strategy

Vision

Our organization is committed to becoming the best black female owned construction company in delivering quality services with dedication and integrity.

Mission statement

To provide the client with highest quality construction services. This will be achieved through a selective use of dedicated and experienced team, which will implement solutions to the environmental crisis will enable us to have a customer long-term relationship. We believe in maintaining a high level of client satisfaction.

Values

- Safety
- Respect
- Trust
- Transparency
- Integrity
- Quality and Planning
- Dedication

Goals and Objectives

To establish and reach targeted market and acquiring market share. Furthermore, to have a continued financial growth, which is our prioritized aim for making the company a success. Business expansion- as a long-term goal: expanding the company physically and in the industry is what Pro-Apert Construction aims for. Pro-Apert construction focuses on applying new innovations to its operations and services to accommodate excellence in current and future service delivery.

General Strategy

New in the work or this industry- Apart from the founder's experience on supervising civil construction works, the company is new in providing services therefore to ensure that our goals are reached the following will be implemented.

1. Conglomerate Diversification

To ensure we account for risk management as a company that still needs to grow, Patiswa Construction will offer a multiple of services that are related and unrelated to civil engineering and construction to provide and maintain financial growth of the company.

2. Branching Out Services and Locations

The aim is that as the company grows more services will be added such as providing safety services, construction material and machinery. Opening up of offices in different cities which will give more work opportunities. The more work the company has the less it will have to deal with retrenchment compensations of employees, and future downgrading of services that lead to loss of clients.

Our Services

Road Works and Repairs

- Asphalt and Emulsion treated base patches
- Earthworks
- Subsoil drainage
- Construction of gravel road

Route Maintenance

- Fencing
- Grass cutting
- Cleaning of road reserve
- Road marking

Concrete Works

Our Approach

Health and Safety

Pro-axpert Construction is mostly dependent on manpower for production, therefore the safety of our team will always be the main priority while also ensuring to protect the client's Investment and property. Pro-axpert Construction complies with the Health & Safety Environment (HSE) regulations to promote a safe working environment that will not only be safe to the laborers but also to the community, Engineers/Supervisors and the client.

Here is a list of HSE procedures to ensure a safe working environment:

- Our team is provided with adequate Personal Protective Equipment (PPEs).
- Access to safety training will be provided for new employees.
- Safety Audits to be conducted weekly and on monthly basis.
- Appointing qualified safety personnel to coordinate the safety procedures.
- Adhering to Health & Safety Environment regulations.
- Actively attend to unsafe working acts or conditions and apply corrective actions.
- Ensuring that every team on our site has an appointed safety representative who will be accountable of the safety of the team.

Management and Ownership

Mr Matimbi Lutendo Daniel is the only owner of Pro-Axpert Construction. He is the shareholder and the director of the company, He is taking care of all the managerial duties of the company which includes Human Resource management and the overall management of the company. At the future intervals of company growth; reaching more stable financial levels will consider additional shareholders and the employment of additional managers in each department of the company.

Quality Management Procedures

Executive Summary

Pro-Axpert Construction management plan integrates our business operation with our rigid quality control procedures which adhere to such as the ISO 9001:2015 International Standards. An additional (designated) quality control manager will be assigned overseeing all the implementation of quality management plan with its focus on coordinating all quality control plans. These include testing, inspection and approval of works undertaken by Pro-Axpert Construction.

The quality manager is responsible of all inspection processes as defined on our construction method statement by ensuring that the work is executed in a manner required and that it meets the required specifications.

Our quality management plan constitutes our business operations and Pro-axpert Construction take prides of its brand and ensures consistent output of the finest quality of works and conduct.

The following part of the document outlines the following aspects:

1. Quality control plan
2. Management structures
3. Human resources management
4. Quality assurance policy
5. Administration policy

Financial policy and Quality Management

Continual improvement of the quality management plan and quality management system will be maintained with the growth of the company, new and applicable management systems will be identified and implemented as when deemed, as per client and project requirements. Our nature of business operation evolves with application and improvement of technologies which brings innovation.

Pro-Axpert Construction is committed to adapt and adopt to new technology by taking part in development programs and courses which may be valuable to the improvement of our business operations.

As Pro-Axpert Construction we believe that best quality and well-maintained quality management system will not only bring clients satisfactions but will make us stand out against competitors by exceeding our clients' expectations.

Pro-Axpert Construction quality assurance is a responsibility of every personnel employed by the company. Our organization is dedicated continuously identify and offer training and skills development programs to its employees for empowerment, in order to ensure best quality of works and services.

Training and skills development programs will be conducted annually by internal assessors and external training service providers to ensure that we align with the norms and requirements of the industry.
